September 1 - 3

“Delicious autumn! My very soul is wedded to it, and if I were a bird I would fly about the earth seeking the successive autumns.” George Eliot

There's simplicity to autumn. Our choices narrow and our attention is more focused. While spring is filled with the energy and enthusiasm stored up from a long winter, autumn is the restorative time needed from a summer of adventure. I love mums. There I said it. They too are simple but dynamic in their color palette and impact. They give the gardener a break from the daunting range of choice that the earlier season brings. Ornamental grasses, cabbage, kale, Montauk daisies and pansies fill out the artistry needed to garden to the edge of winter. Who doesn't love the feel of harvest that the pumpkins, cornstalks, straw and Indian corn bring our homes. Autumn also brings the moderating weather that makes planting perennials, shrubs and trees for tomorrow's garden a reality today. So whatever picture you want to paint, come on down to Bayport Flower Houses and feel autumn in all its dimensions.

All the best,
Karl

Sympathy Flowers ~ A Celebration of Life

Flowers know what to say. The ceremony deals primarily with intellectual concepts and doesn't fully engage the bereaved person's feelings.

Flowers express the inexpressible. It's often difficult for those mourning a death to put feelings into words.

Flowers are a visual expression of love, sympathy, and respect and give people something nurturing and restorative at a time of loss, even when they're just in the background. Those who have attended services where there were no flowers have expressed the feeling that something was missing. Following the service, the bereaved are left with an indelible impression of the funeral. Flowers are a very important item in this lasting impression, for they directly affect the warmth and comfort generated by the "memory picture." The more comforting the memory picture, the more easily it is recalled by the bereaved; and the more vivid is the reinforcement of reality and actualization of loss. Flowers do not wither and die in the mind of the bereaved. They are recalled time and again as indelible memories.

Families deserve their freedom of expression at time of death. People are not cast from the same spiritual or emotional mold. Therefore, they should be free to express themselves in the manner which best conveys their emotions. Any expression that is the result of dictate ceases to be an act of the heart.

Traditions don't die. Americans traditionally have expressed their respect for the dead and sympathy for the bereaved by sending flowers. This long-standing custom helps people express their innermost feelings. Funeral flowers are for the living and the dead. They are tokens of respect for the deceased.

Flowers are soulful. Flowers symbolize not only of the love and sympathy, but also of eternity and immortality. Flowers help minister to the bereaved by giving testimony of the love and understanding of fellow human beings. The life of flowers is fleeting. There is profound spiritual symbolism in the very fact that flowers do not last forever.

September brings the cooler days of Autumn and with that the beautiful blooms of Fall Mums. A favorite because of their dense flower blooms, mums brighten any landscape or container.

Our mum fields are planted by hand in late June and tended to with care throughout the summer months. Colors include bright yellows & whites, lovely purples and burgundies as well as oranges. This year we are pleased to offer both our traditional, 4.5", 6" and 9" pots along with beautiful hanging baskets and large 12" pots. Mum plantings in bushel baskets or peanut baskets make great gifts.

They're here...no, we haven't been watching Poltergeist (although what a great movie!) We're talking about DEER. Yes, our friendly Bambi has been sighted in our south shore neighborhoods. So here's a few suggestions for perennials that deer do not like. If your looking for deer resistant gardens there are plenty of options and we're always here to give you recommendations. One of our folklores that seem to work are scented, textured and blue. We also offer some deer resistant products which repel by either taste or odor to help protect your landscape.
